

Intercommunications and quick response is a key component of an effective nurse call system. Understanding how best to apply current technology is one of Protex Central's specialties. From simple tone-visual systems for assisted living care applications, to complex audio-visual networked systems for acute care applications, Protex Central selects products from leading manufacturers such as Aiphone and Jeron Electronic systems to provide cost-effective and reliable solutions.

UL Listed Fire Alarm Installation Contractor

Protex Central is listed with Underwriter's Laboratories as a fire alarm installation contractor. Protex Central voluntarily participates in this independent, third party verification service. UL listing is an owner's assurance that the listed contractor has demonstrated and maintains a performance capability to design, install and maintain fire detection and alarm systems in accordance with applicable codes and standards.

NICET Certified Fire Protection Technology Technicians

In addition to maintaining required local alarm licenses, many of Protex Central's system designers and technicians voluntarily submit to certification testing administered by the National Institute for Certified Engineering Technicians in the field of fire protection technology. NICET certification is an owner's assurance that the individuals designing, installing, programming and servicing the fire suppression systems have met a written test and field experience standard along with meeting continuing education requirements.

Code Compliant Inspection & Maintenance Services

Periodic system inspection and maintenance services are the cornerstone of Protex Central's business.

Custom-tailored agreements are available from simple inspection-only services up to complete full service maintenance service agreements. All inspections are performed in accordance with the applicable local standards as well as those of the National Fire Protection Association. All Protex Central inspection customers may participate in the Preferred Customer Discount Program. This program allows customers to take advantage of additional discounts and, coming soon, access to on-line inspection records.
